

Enhanced quality

Using the technology Noritsu has developed over the years as a leader in silver halide printing, QSS Green III delivers a level of quality that exceeds all expectations.

High quality & High resolution

Beautiful, sharp prints with multiple dot gradation dye ink system

QSS Green III uses a high-grade dye ink system that accurately portrays fine details due to its multiple dot gradation technology. The high quality ink, combined with the excellent absorbing quality of the paper, enables QSS Green III to produce outstanding print quality.

Two profiles to choose from

There are two profiles available as a standard feature of QSS Green III - A profile to emulate traditional printing (AgX) and a full color inkjet (IJ) gamut profile that explodes with colors well beyond the traditional look. The profile can be easily changed anytime to meet individual needs.

High grade ink produces long lasting colors

Prints made with conventional dye ink tend to fade quickly. However, the ink used in QSS Green III enables prints to withstand light and ozone. This is why QSS Green III prints boast excellent lightfastness and long lasting colors.

QSS Green III can make impressive 1,440 x 1,440 dpi high-resolution prints

1,440 x 1,440 dpi high resolution prints are less grainy and have smoother gradations than standard prints. This improves the portrayal of contrast, texture and depth.

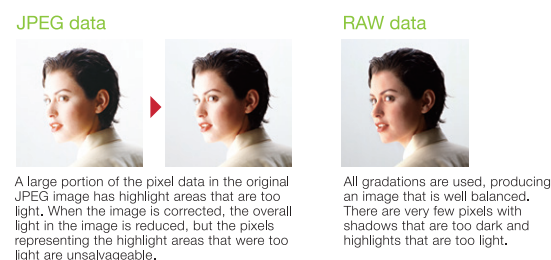

RAW file printing

High quality prints from RAW image files

Adobe's DNG conversion technology is incorporated in EZ Controller software along with Noritsu's AccuSmart image processing technology. This means you can easily make high quality prints from RAW image files without using separate RAW file conversion software.

Optimize the image with EZ Controller

EZ Controller (Sold separately)

In addition to serving the important role of system operation software, EZ Controller has a wealth of advanced image correction functions to correct sharpness, contrast, noise, backlight, red-eye, and under/over exposure, and more.

The best just got better

Enhanced value

With QSS Green III's wide variety of print services, you can provide new ways for your customers to enjoy their photos.

Print Size Advantage

Enlargements / Panoramas

QSS Green III can make enlargements in sizes of 305 x 254 mm (12" x 10"), 305 x 457 mm (12" x 18"), and many other sizes, including panorama prints all the way up to 305 x 1,400 mm (12" x 55"). This enables you to provide personalized photo products such as poster prints, locker prints, and just about any custom print size you can think of.

*1 In case of using non-Genuine Noritsu paper, QSS Green III only supports sheet paper with thicknesses in the range of 0.170 to 0.400 mm. Print quality and/or mechanical failure related to the use of non-Genuine Noritsu papers may not be covered by Noritsu warranty and/or your local dealer service program/s.

Enhanced business

With its high capacity and labor-saving features, QSS Green III has what photo retailers need.

Sheet Paper

Supports sheet paper as well as roll paper

QSS Green III can produce prints from both roll paper and sheet paper. Sheet paper gives you the ability to produce high quality duplex prints, which opens the door to a whole new realm of exciting value-added print possibilities.

Automatic Order Sorting

Two print sorters to choose from

You can choose the 4-order print sorter or the 12-order print sorter.

LED lights indicate interrupted orders

EZ Controller software has always had the unique ability to interrupt orders in process to give preference to urgent orders. Now, with the 12-order print sorter, LED lights are used to indicate which trays have urgent orders and which have interrupted orders.

Economical / Eco-Friendly

Easy to use, easy on your wallet, and easy on the environment

There are no photofinishing chemicals involved with dry systems. This brings a reduction in time and costs as you no longer have to be concerned about maintaining specific chemical temperatures and conditions as well as the handling and disposing of chemical solutions. With the exception of paper, the only consumable replacement needed for this environmentally-friendly minilab is the ink cartridge which can easily be replaced by anyone.

Easy ink cartridge replacement

Energy-efficient

QSS Green III can help you cut your electricity bill drastically. It is estimated to use only about 1/3 to 1/5 the amount of electricity that silver halide minilabs use. This reduction in power consumption makes it both economically-friendly and ecologically-friendly.
